8 questions per slide

Google
Slides

Getting to grips with calendars and how they work. There are 48 question across 6 Google slides, where each poses a question from one of 6 different calendars each displaying a single month view. Study the calendar on each slide and answer the question below. This tests the student's ability to scan through the details on the calendar, looking for relevant information, like the number of days between events, the number of weekends without a scheduled event, how many times a certain event happens, etc. Questions are either multiple choice, numeric or text-based. Text-based questions are looking for something obvious, like the name of the day of the week or month.

January 2014

Sun	Mon	Tue	Wed	Thu	Fri	Sat
1	2	3	4	5	6	7
8	9	10	11	12 Dentist	13 First day of study	14
