Multi-choice

Look at the series of interconnected clockwork cogs & gears. When you turn the first clockwork cog's handle, which direction will the indicated clockwork cog turn?

These physics puzzles start out very simple but become ever more complex.

Watch out for disconnected cogs, which would result in certain cogs not turning at all

**Clockwork cogs**

Look at the cogs and how they are connected. What will happen with the green cog when the yellow cog is turned in the direction indicated?
