

# Compound Words #1

Drag to make a compound word

32 Boom cards

Click [HERE](#) for a playable preview

Make new compound words from the individual words presented.

Each card presents 6 individual words. Pairs of these words join together to make a new compound word. There are 3 new compound words to be found on each card.

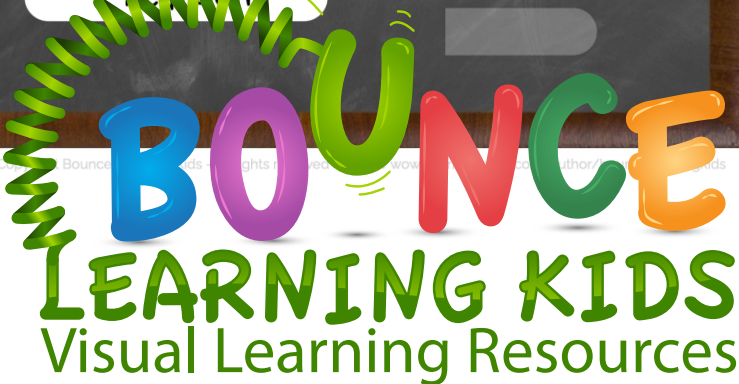

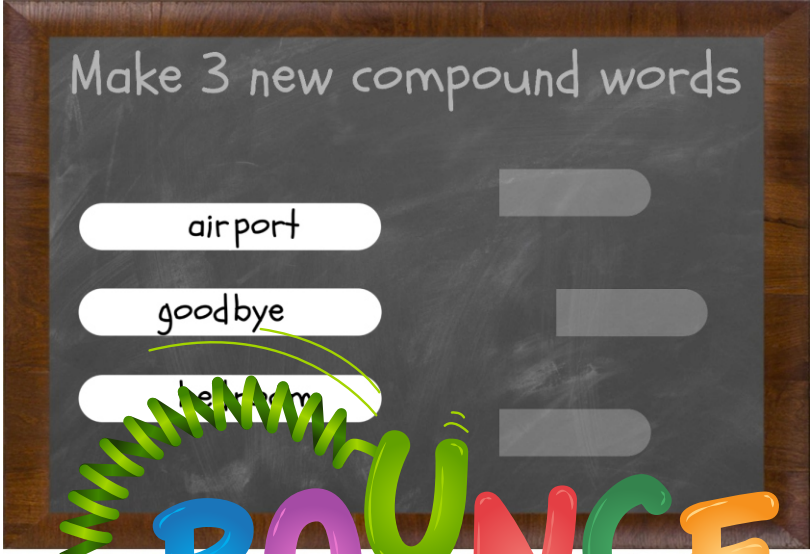

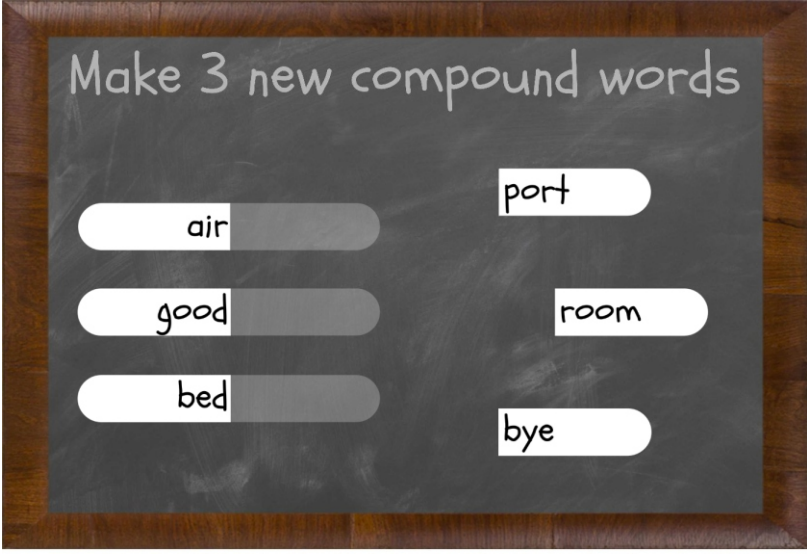

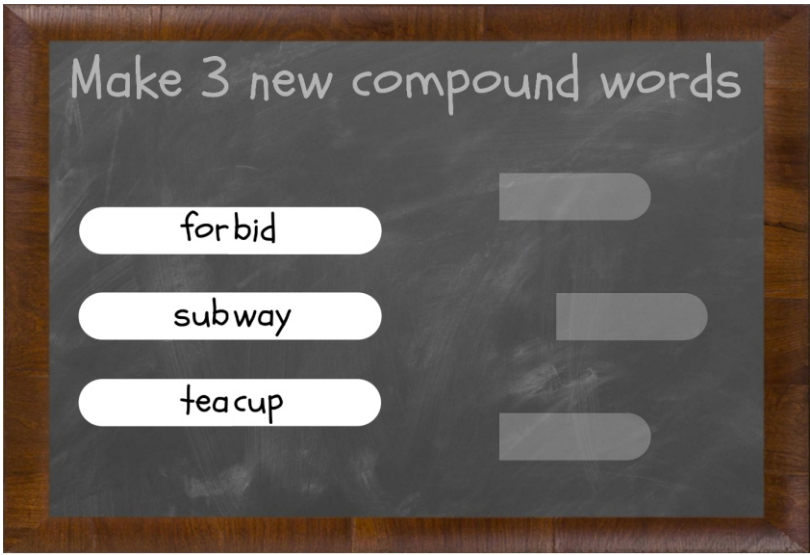

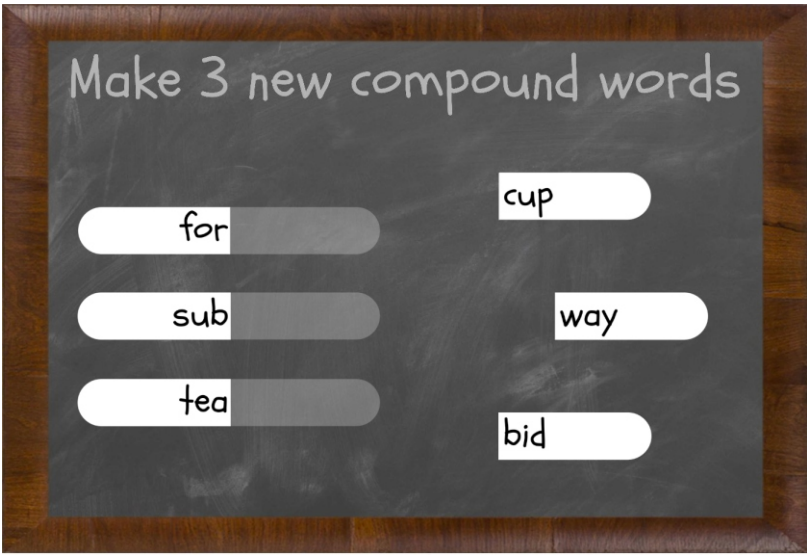

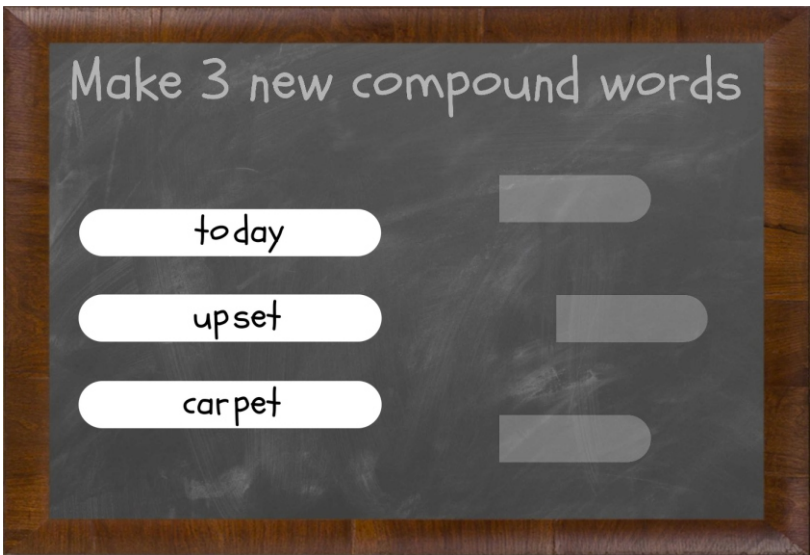

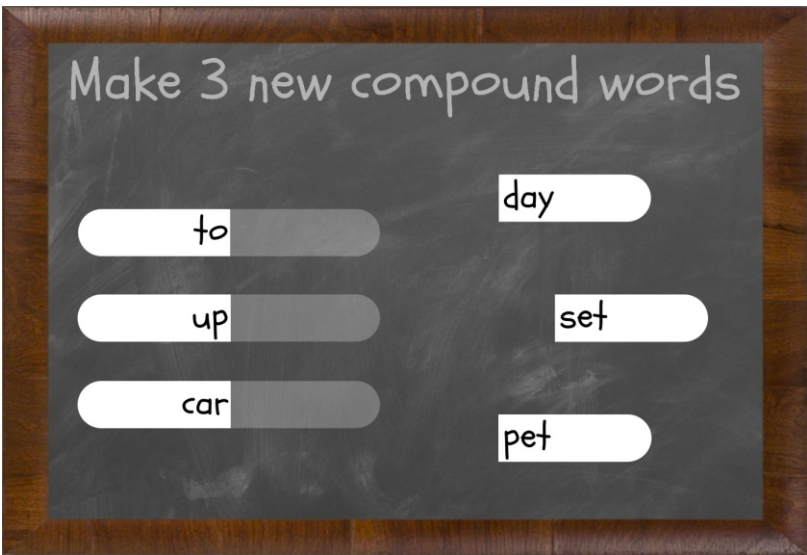

Simply drag the words on the right to the appropriate position on the left to join the two words together. When all three pairs of individual words are correctly matched together to form the correct 3 compound words, the deck advances to the next slide. Get it wrong and the words will just bounce back to their starting positions so you can try again.

To help illustrate what you need to do and to help get you going, the first two cards provide color-coded individual words. Just match the colored words together to solve the card. Thereafter, you have to find the right pair yourself.

With the exception of the first two cards, this 32-card deck is randomised, so no two students will see the same order of cards.

With 6 words and 3 compound words per card, this 32-card deck has 192 words and 96 compound words that need to be found.

In this deck, you are looking to match the second part of the compound word to the first. In the next deck, it's the other way around.

You may be eligible for a free trial from Boom Learning. Read here for details: <http://bit.ly/BoomTrial>. If you choose not to stay on a premium account after your free trial, you will still be able to assign all your Boom Cards to as many students as you see fit using Fast Play pins (which give instant feedback for decks that are self-grading).
