Coordinate grids is a fun deck to help introduce the concept of coordinates. The student is presented with a 4x4 grid with coordinates indicated along the top and side (A, B, C & D across the top; 1, 2, 3 & 4 down the side - just like in a spreadsheet). In the grid are various objects, which are also labelled in a key on the right. Each card poses a question, which could be either in the form:

1. What is located at grid reference X? The student clicks on the appropriate object in the list below.

or

2. Where is X on the grid? The student clicks on one of the 16 grid references in the list below. This way, the student must find the correct grid reference first.

There are 3 different grids each with 8 questions (4 of each of the above types). The deck is randomised, so the 24 question slides will appear in a random order.
