Coordinate grids 2 is a fun deck to help introduce the concept of coordinates. The student is presented with various grids with coordinates indicated along the top and side (A, B, C, D, etc. across the top; 1, 2, 3, 4, etc. down the side - just like in a spreadsheet). In the grids are various objects. Some grids have a key but others don't, so the student has to think a bit harder. Each card poses a question, about the contents of the grid.

There are 4 different grids each with a total of 50 questions. The deck is randomised, so the 50 question slides will appear in a random order.

Decks in this series:

- Coordinate Grids 1 (easier)
- Coordinate Grids 2 (harder)
