

# Crossword Math 2

## 10 Boom cards

Click [HERE](#) for a playable preview

Crossword math 2 is exactly like doing a regular crossword but with numbers instead of words. This is an amazingly fun way to make math seem like play. The crossword 'clues' are math sums you have to solve to reveal the answers as numbers in the crossword grid.

Each card has a challenging sum at the bottom which can be used to validate some of the numbers in the main grid.

There are 10 slides in this deck:

- 2 x Addition
- 2 x Subtraction
- 2 x Multiplication
- 2 x Division
- 2 x Mixed (all operators)

Each card has anywhere from 12 to 18 sums to be solved, excluding the bonus sum at the bottom.

The collage shows 10 different crossword math cards. Each card features a grid of empty boxes for numbers, with some boxes highlighted in different colors (red, blue, green, purple, black, pink, orange). Below each grid are clues for 'ACROSS' and 'DOWN' directions, each followed by a math problem. The problems include addition, subtraction, multiplication, and division. A large 'BOUNCE' graphic is overlaid on the bottom right of the collage, with the word 'BOUNCE' in large, colorful, bubbly letters. Below it, the text 'LEARNING KIDS' is written in green, and 'Visual Learning Resources' is written in a smaller font. At the bottom left of the collage, there is a bonus sum:  $15^3 \times 17^3 =$  followed by a grid of boxes.

You may be eligible for a free trial from Boom Learning. Read here for details: <http://bit.ly/BoomTrial>. If you choose not to stay on a premium account after your free trial, you will still be able to assign all your Boom Cards to as many students as you see fit using Fast Play pins (which give instant feedback for decks that are self-grading).
