Logic Puzzles numbers is a fun series of BOOM cards that test a student's mental math skills with basic arithmetic.

A 2x2 grid is displayed into which the student must place 4 numbers. These numbers sum in both directions (horizontally and vertically) to make 4 additional numbers. Only the correct permutation of numbers added to the grid will result in the sums all working out correctly.

The first few slides are relatively simple, and will allow the student to get the hang of things. They become progressively more challenging as you progress through the deck.

In this deck, only addition sums are presented. Check out my other decks for similar math puzzles but with subtraction, division, multiplication and even various combination of them together.

Grab them all with the bundle, for hours of fun!

A logic puzzle card with a colorful background of numbers and plus signs. The puzzle is a 2x2 grid with the following sums:

<input type="text"/>	<input type="text"/>	2
<input type="text"/>	<input type="text"/>	2
2	2	

A logic puzzle card with a colorful background of numbers and plus signs. The puzzle is a 2x2 grid with the following sums:

<input type="text"/>	<input type="text"/>	3
<input type="text"/>	<input type="text"/>	7
4	6	

A logic puzzle card with a colorful background of numbers and plus signs. The puzzle is a 2x2 grid with the following sums:

<input type="text"/>	<input type="text"/>	8
<input type="text"/>	<input type="text"/>	14
7	15
