

Logic Puzzles numbers

Addition & Subtraction math puzzles

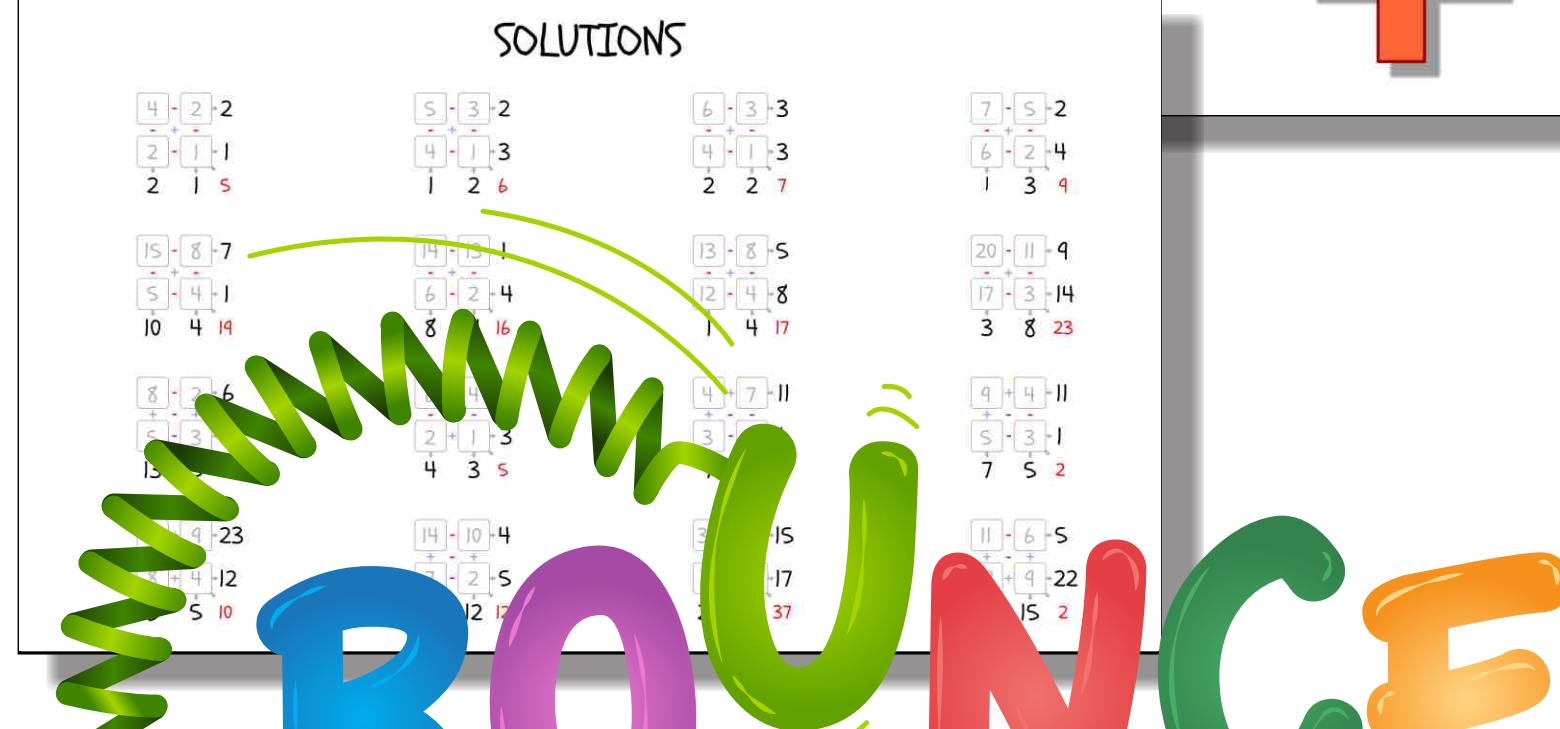

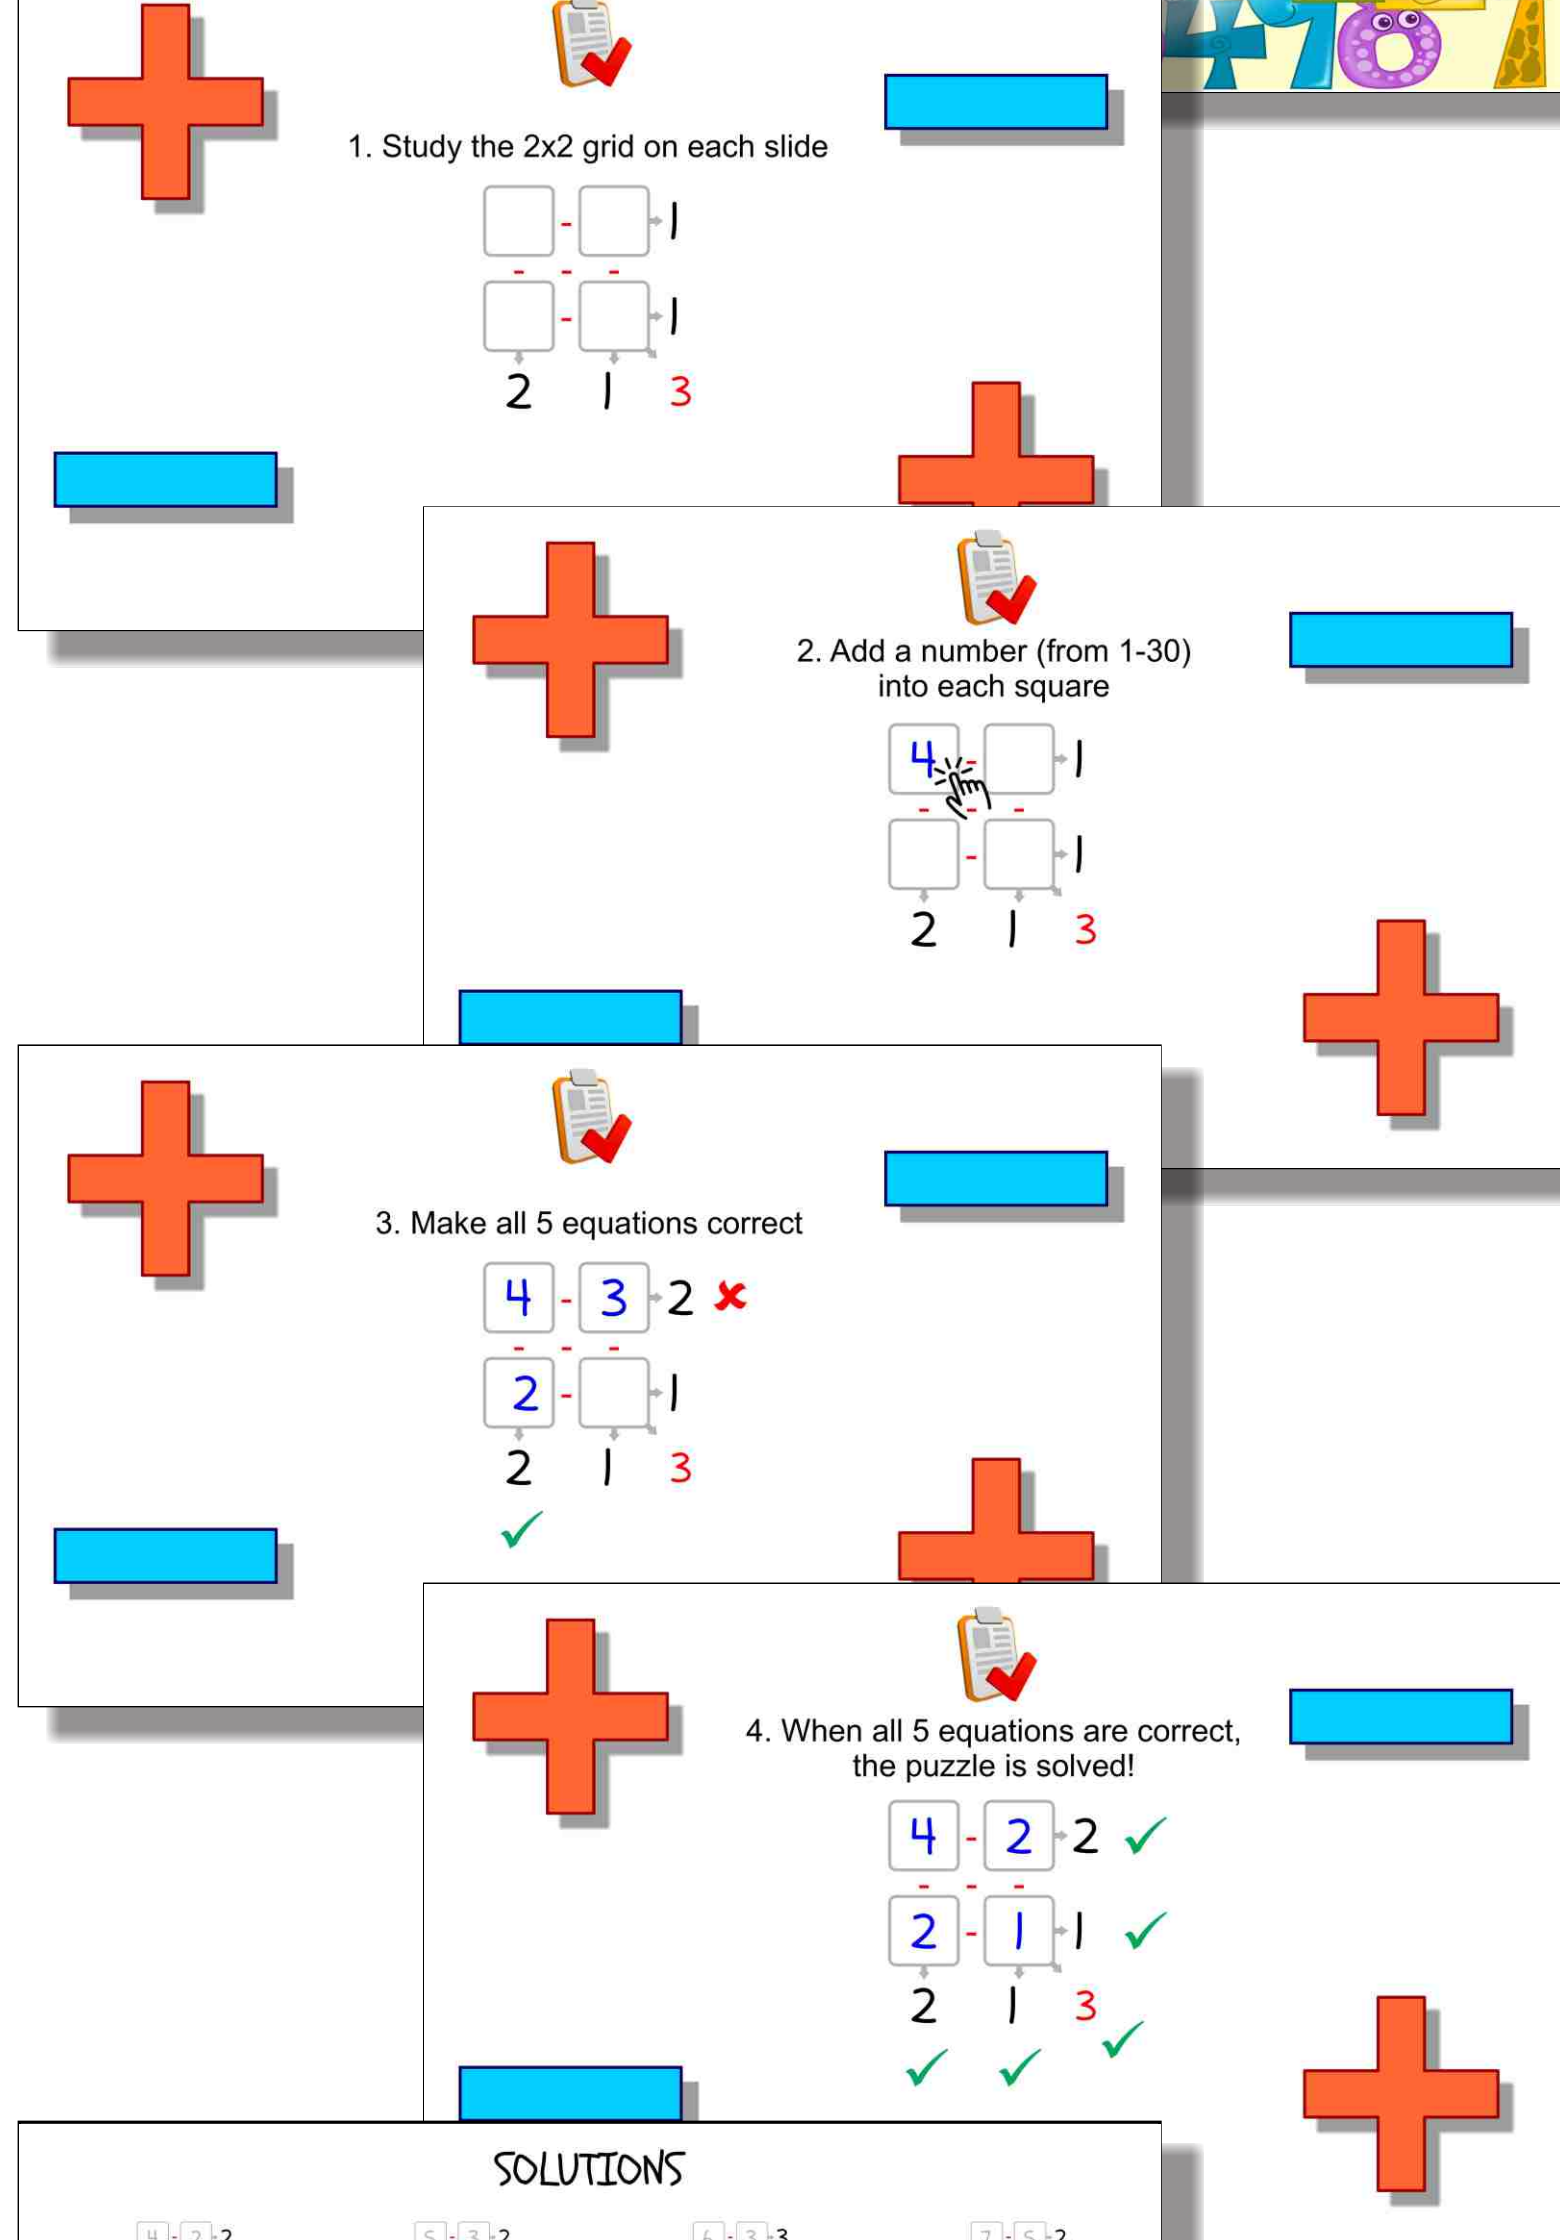

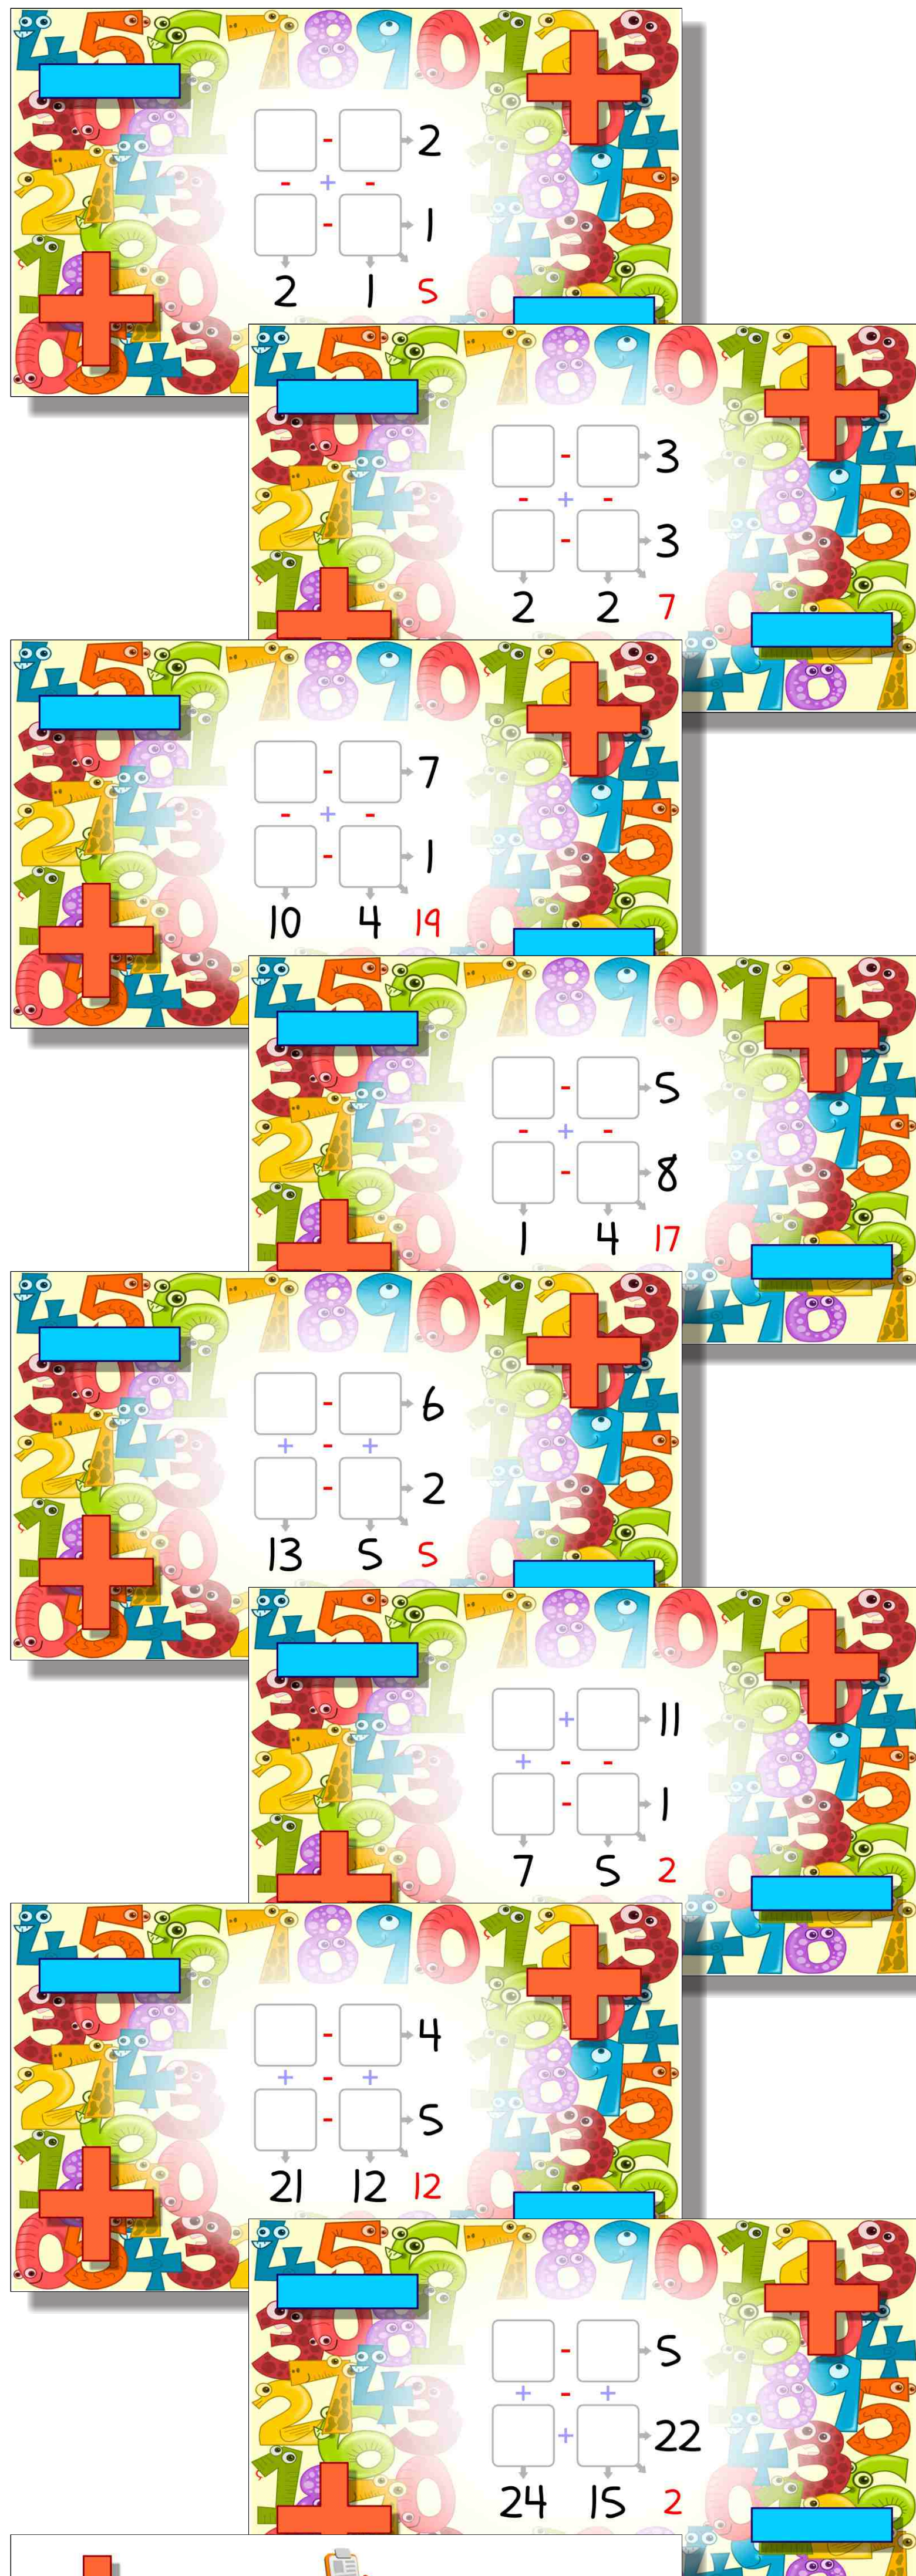

21 Google slides

4 instruction slides

1 solutions side

16 addition puzzle slides

Logic Puzzles numbers is a fun series of GOOGLE Slides that test a student's mental math skills with basic arithmetic through a fun game of trying to find the right numbers to make all the sums work. A 2x2 grid is displayed into which the student must place 4 numbers. These numbers **add** or **subtract** in various directions (2 horizontal, 2 vertically & 1 diagonally) to make 5 additional numbers. Only the correct permutation of numbers added to the grid will result in the sums all working out correctly. The first few slides are relatively simple, and will allow the student to get the hang of things. They become progressively more challenging as you progress through the deck. In this deck, **addition** and **subtraction** sums are presented.
