Make 10 is a fun series of number puzzles where you have to find adjacent numbers in a grid that add up to 10. Try to find them all.

Each of the 4 unique number grids appears twice in this deck - once for horizontal & vertical adjacent numbers and once for diagonal adjacent numbers.

Study each grid and pay attention to the instructions on the right. You are either looking for two horizontal & vertical adjacent numbers or you are looking for two diagonal adjacent numbers. Find each number that forms part of a pair of numbers that together add up to 10. Only when all correct numbers are selected can you move to the next puzzle deck.

This deck features 8 puzzle grids of 6x6 numbers.

8	5	6	8	4	5
9	5	4	5	2	6
9	3	4	6	2	1
4	1	8	4	4	4
3	6	3	4	7	7
7	3	6	3	7	1

Select all adjacent numbers which make 10 using exactly 2 numbers diagonally

5	7	7	2	1	5
9	2	6	5	9	4
6	5	1	4	8	3
8	4	6	5	2	9
8	2	9	9	8	2
2	8	1	3	2	1

Select all adjacent numbers which make 10 using exactly 2 numbers horizontally or vertically

4	3	2	2	2	4
9	2	4	6	5	3
1	5	2	4	7	1
1	9	5	3	7	3
1	2	4	1	6	8
9	5	7	5	4	6

Select all adjacent numbers which make 10 using exactly 2 numbers diagonally
