

Math Circles

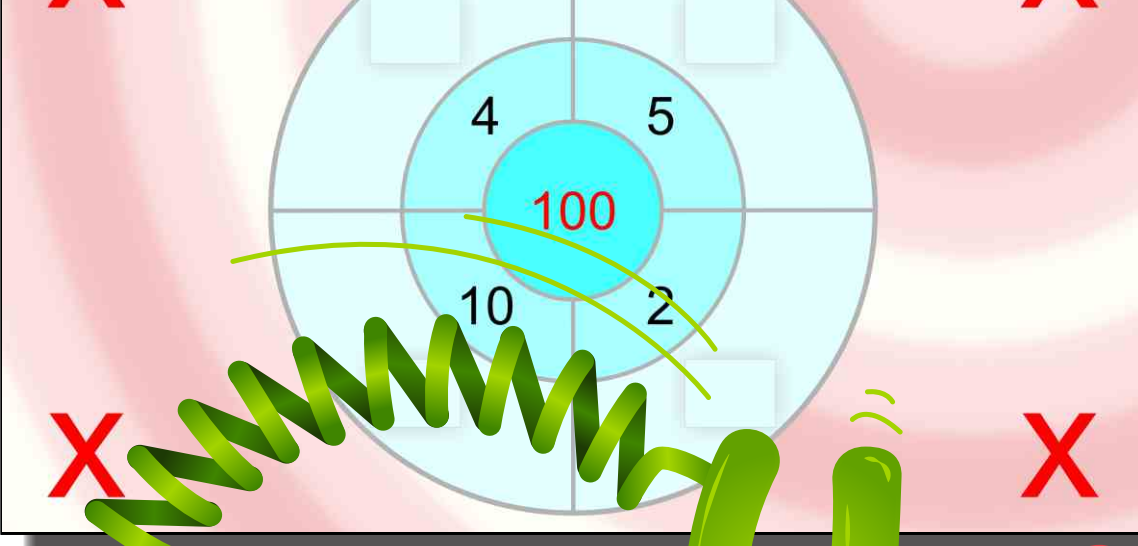

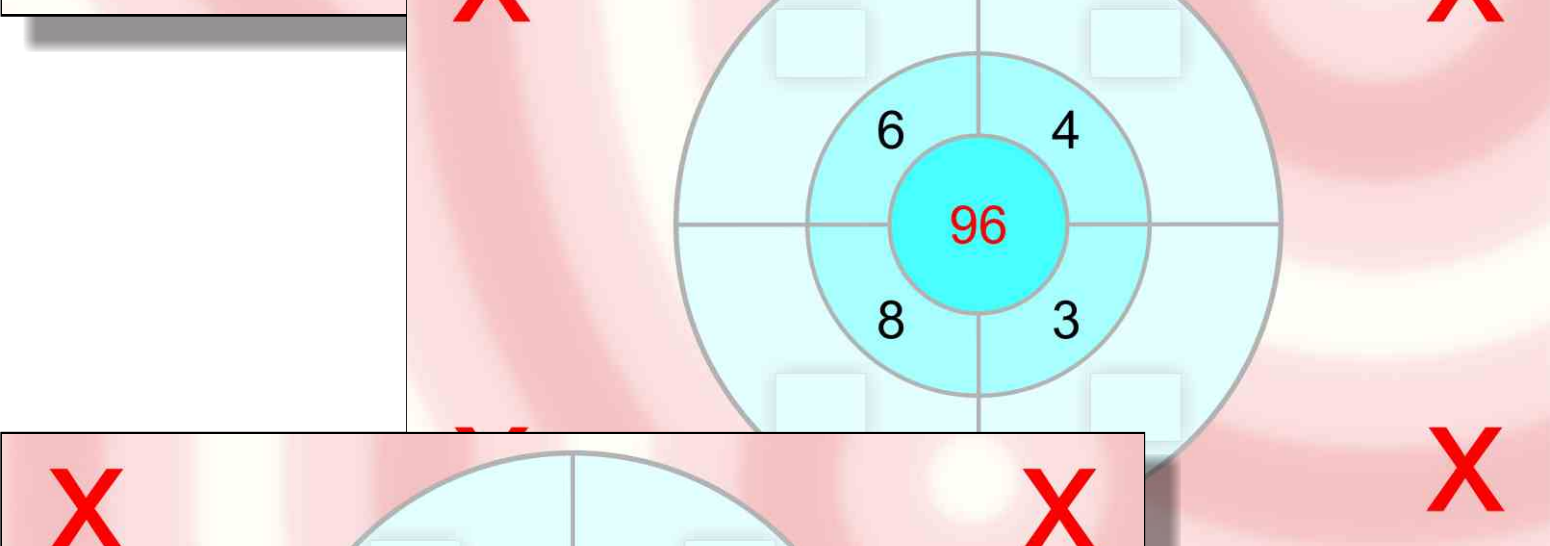

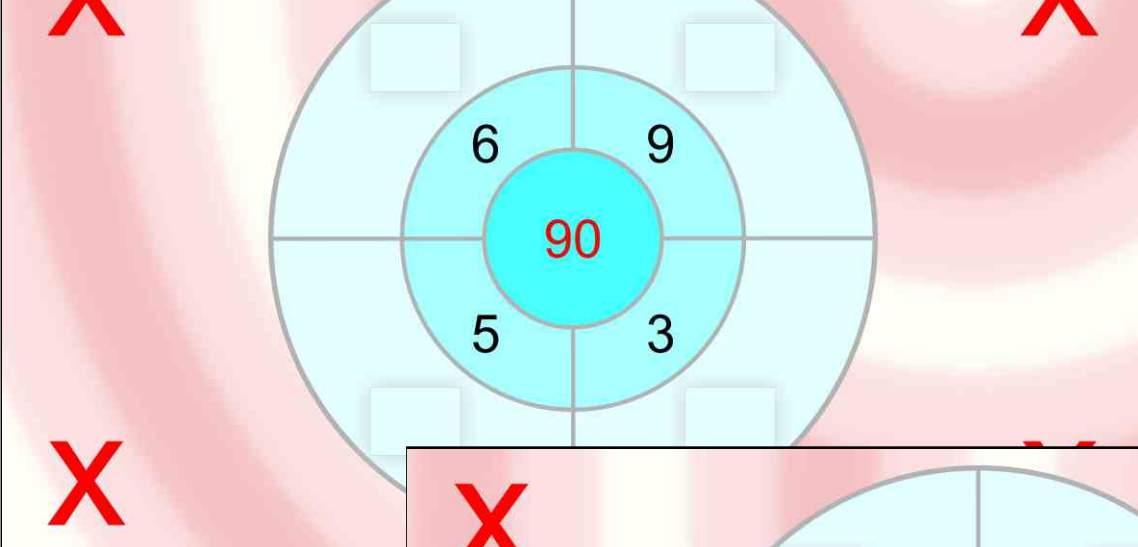

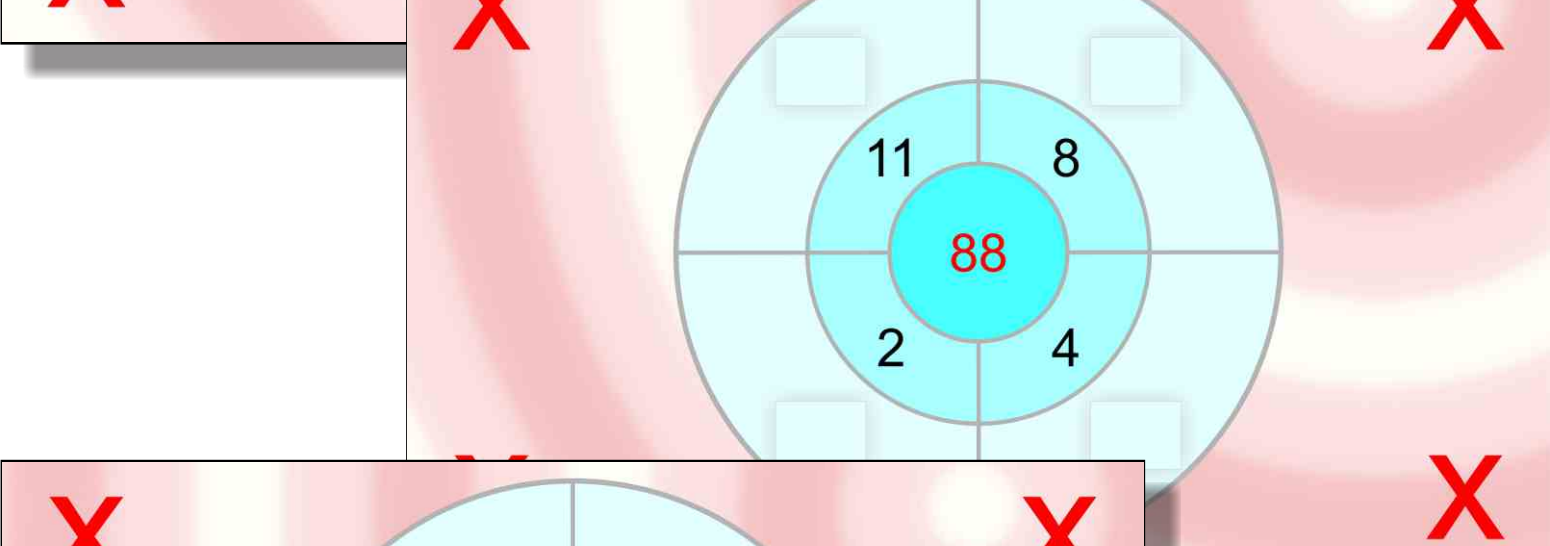

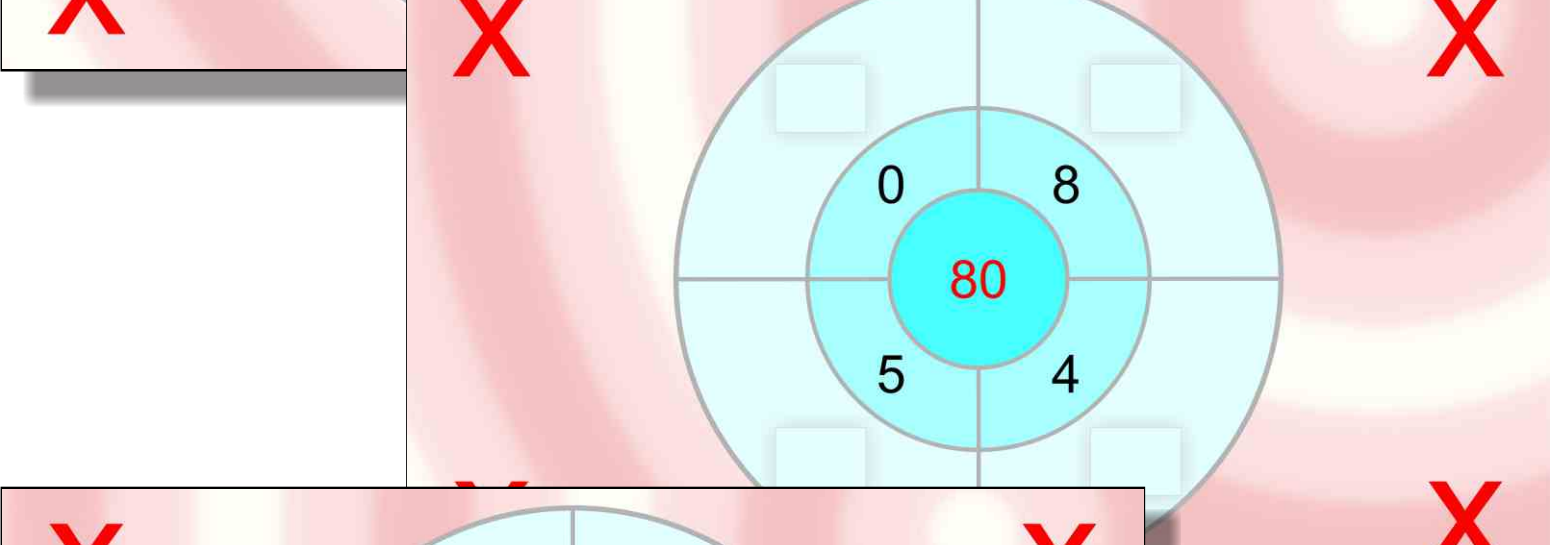

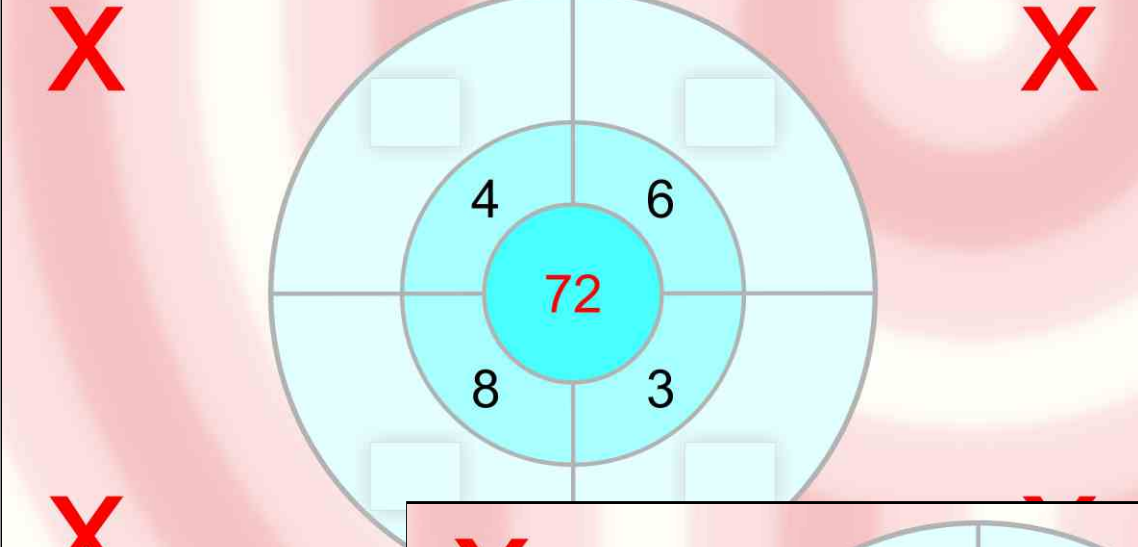

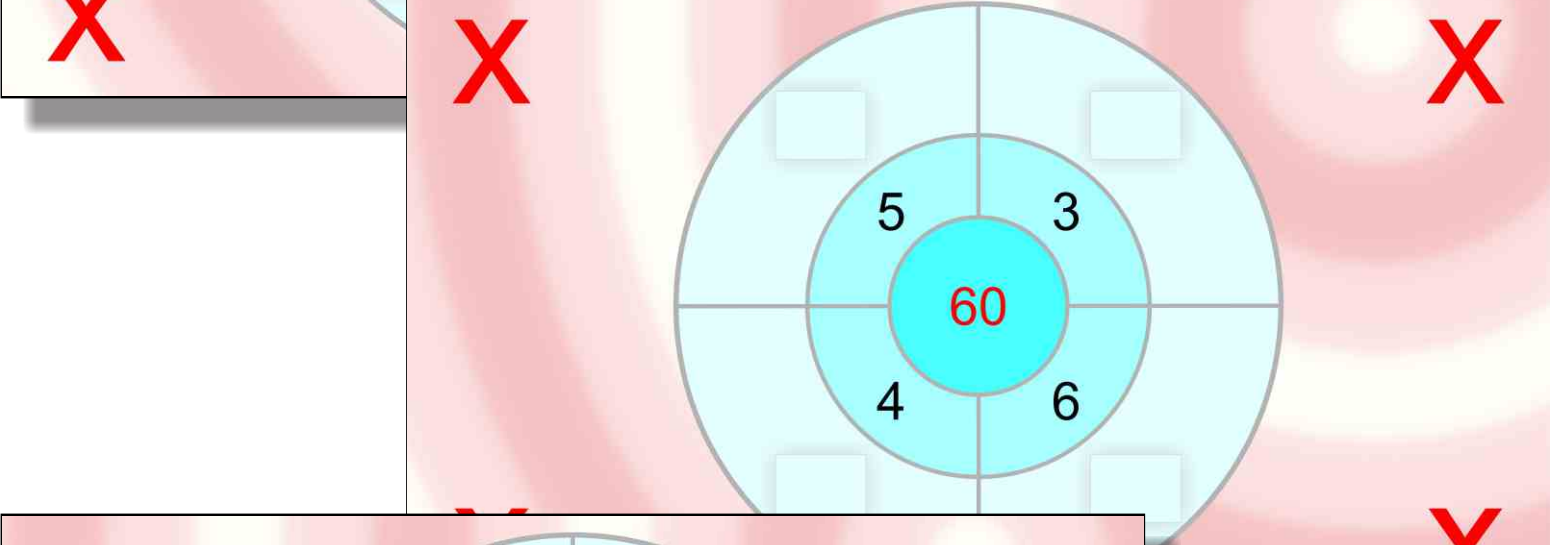

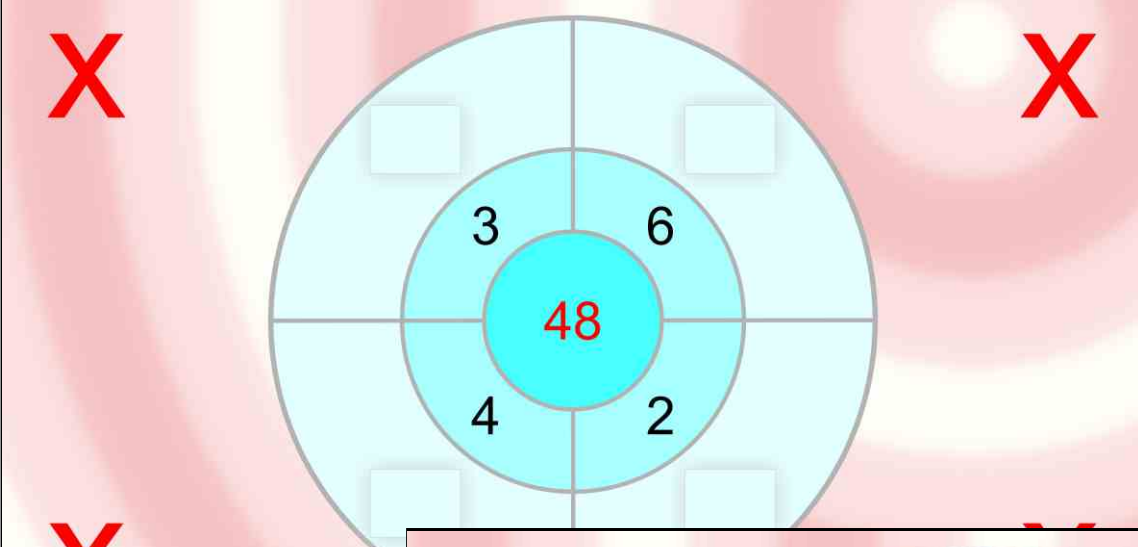

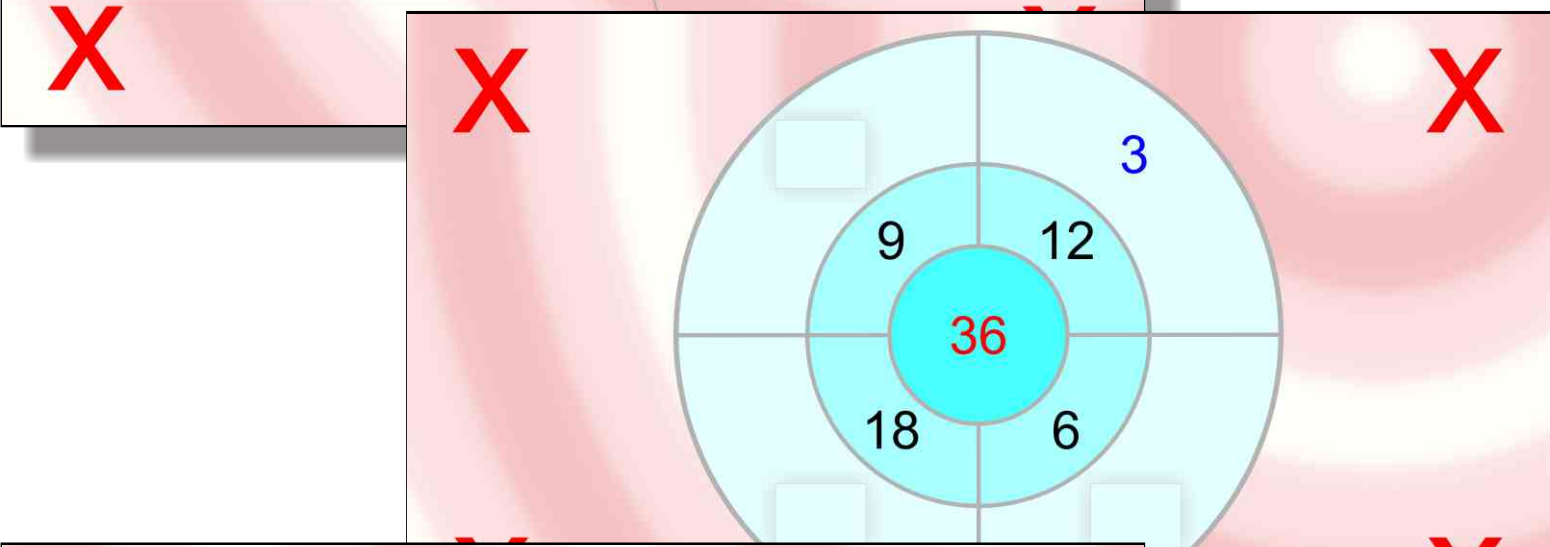

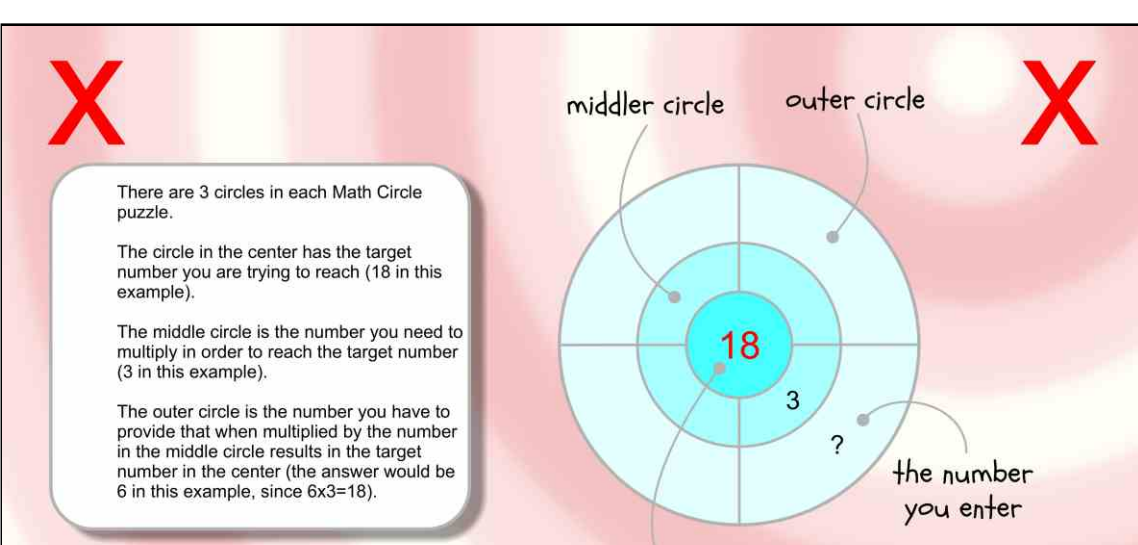

Multiplication

10 puzzle slides

1 instruction slide

Audio assist

Math Circles Multiplication is a fun series of GOOGLE Slides math puzzles to help practice multiplying two numbers together. Find the correct number that when multiplied by the middle number makes the target number in the center. Do this for each number around the circle. This is a fun way to practice multiplication. Each Math Circle has 10 basic multiplication problems to solve. Work your way around each circle until all 4 numbers have been entered. There are 10 Math Circle puzzle slides each with 4 basic multiplication problems to solve. The multiplication problems have been specifically designed to help the student spot patterns in the numbers, helping to solidify their learning. An instruction slide at the front illustrates what you need to do and has audio assist, so the student can 'listen' to the instructions.
