Math Circles Addition is a fun series of math puzzles to help practice adding up two numbers. Find the correct number that when added to the middle number makes the target number in the center. Do this for each number around the circle.

This is a fun way to practice addition. Each Math Circle has 10 basic addition problems to solve. Work your way around each circle until all 10 numbers have been entered. When all correct numbers are in place, you can advance to the next card.

There are 18 Math Circle puzzles each with 10 basic addition problems to solve.

The addition problems have been specifically designed to help the student spot patterns in the numbers, helping to solidify their learning.

An instruction card at the front illustrates what you need to do and has audio assist, so the student can 'listen' to the instructions.

You may be eligible for a free trial from Boom Learning. Read here for details: <http://bit.ly/BoomTrial>. If you choose not to stay on a premium account after your free trial, you will still be able to assign all your Boom Cards to as many students as you see fit using Fast Play pins (which give instant feedback for decks that are self-grading).
