

Money Search US #2

Find the one occurrence of the indicated value with exactly 3 coins

34 puzzle slides

(only a selection shown here)

A fun game of wordsearch... but with a twist. Find the indicated value of US coins in the wordsearch grid with exactly 3 coins in this fun GOOGLE Slides money counting game. This is just like a regular wordsearch puzzle but instead of letters, combinations of American coins are used. The student is presented with a 4x4 grid of coins and asked to find a target value of coins in a straight line with exactly 3 coins. The student then has to indicate on the grid where that combination of coins can be found in any straight line, horizontally, vertically or diagonally. There is only one solution on each slide to be found. This is an excellent resource for learning to count money and basic mental arithmetic and addition.
