

Money Search

AU #1

20 Boom cards

Click [HERE](#) for a playable preview

A fun game of wordsearch... but with a twist.

Find the exact combination of Australian coins in the wordsearch grid in this fun money counting game.

This is just like a regular wordsearch puzzle but instead of letters, combinations of Australian coins are used.

The first couple of cards are very simple and will help explain how the game works. Thereafter, the deck contains a mixture of easier and harder grids to solve and is randomised.

The student is presented with a grid of coins and asked to find a specific value using specific coins, such as 40c in 10c coins, etc. A visual of what that target combination of coins looks like is also presented by way of a visual cue. The student then has to find that combination of coins in any straight line, horizontally, vertically or diagonally, just by clicking on them. Only once they have found every occurrence of those combination of coins will the card be solved and you are advanced to the next card in the deck.
