

Mystery Picture Math instructions

+

=

1

Each child begins with an empty starting grid. Print this page multiple times - once for each child.

2

For each child, print out ONE of the 7 question sheets depending on their ability. All the sheets (with the same letter) produce the same set of numbers.

3

Using the answers from the question sheets fill in the numbers on the starting grid. When the correct numbered squares are filled in, the mystery image is revealed.
