Meet Olliver, the extraordinary owl, who speaks using numbers instead of letters. Each letter of the alphabet corresponds to a number from 1-26. For each number in Olliver's 'words', the student must locate the corresponding letter from the key and type it into the correct place. This is a great GOOGLE Slides game to help recognize letters and numbers and to apply critical thinking. Olliver will guide the student through a series of instruction slides, including a couple of simple puzzles to solve. Once that's complete, there are 10 additional number code puzzles to complete. The number of letter/number combinations on the slides increases as you progress through the deck. This deck includes audio assist. Just click the speaker icon to hear the instructions spoken out.
