

Probability 'A'

When the arrow spins, it stops and points in a random direction. Answer the probability question!

What is the probability the spinner will point to Yellow?

What is the probability the spinner will point to Blue?

What is the probability the spinner will point to Green?

What is the probability the spinner will point to Blue?

What is the probability the spinner will point to Orange?

What is the probability the spinner will point to Green?

What is the probability the spinner will point to Yellow?

What is the probability the spinner will point to Blue?

What is the probability the spinner will NOT point to Blue?

What is the probability the spinner will NOT point to Yellow?

What is the probability the spinner will NOT point to Blue?

Probability 'C'

Look at the different types of dice below. Answer the probability question!

You throw a single die

What is the probability you will throw a 6?

What is the probability you will throw an odd number?

What is the probability you will throw less than 5?

You throw 2 dice

What is the probability you will throw a double number?

What is the probability you will NOT throw 12?

What is the probability the spinner will point to Yellow?

You throw a 12-sided die

What is the probability you will throw a double-digit number?

What is the probability you will throw a number divisible by 3?

What is the probability you will throw an even number?

What is the probability you will throw a number less than 10?

What is the probability you will throw more than 10?

Probability 'E'

You have the below scrabble letters in front of you. Answer the probability question!

Choose 1 letter at random. What is the probability you will choose a vowel?

Choose 1 letters at random. What is the probability you will choose a 3-point letter?

Choose 3 letters at random. What is the probability you will make the word CAB?

Choose 1 letter at random. What is the probability you will NOT choose a vowel?

Choose 2 letters at random. What is the probability you will score more than 5 points?

Choose 3 letters at random. What is the probability you will make the word STOP?

Choose 1 letter at random. What is the probability you will choose a vowel?

Choose 2 letter at random. What is the probability you will choose a vowel?

Choose 2 letters at random. What is the probability you will choose a vowel?

Choose 1 letter at random. What is the probability you will choose a vowel?

Choose 2 letters at random. What is the probability you will choose a vowel?

Probability 'G'

You have some pieces of fruit in your lunch box. Answer the probability question!

Choose 1 piece of fruit at random. What is the probability it will be a banana?

Choose 1 piece of fruit at random. What is the probability it will NOT be a banana?

Choose 2 pieces of fruit at random. What is the probability you will choose 2 apples?

Choose 1 piece of fruit at random. What is the probability it will NOT be an orange?

Choose 1 piece of fruit at random. What is the probability it will be a banana?

Choose 2 pieces of fruit at random. What is the probability they will be different fruits?

Choose 1 piece of fruit at random. What is the probability it will be a banana?

Choose 1 piece of fruit at random. What is the probability it will be an orange?

Choose 2 pieces of fruit at random. What is the probability they will both be oranges?

Choose 1 piece of fruit at random. What is the probability it will be yellow?

Choose 1 piece of fruit at random. What is the probability it will be orange?

Choose 2 pieces of fruit at random. What is the probability they will be an apple and an orange?

Probability 'B'

When the arrow spins, it stops and points in a random direction. Answer the probability question!

What is the probability the spinner will point to Orange?

What is the probability the spinner will point to Green?

What is the probability the spinner will point to Yellow?

What is the probability the spinner will point to Yellow?

What is the probability the spinner will NOT point to Blue?

What is the probability the spinner will point to Yellow or Green?

What is the probability the spinner will NOT point to Blue or Green?

What is the probability the spinner will point to Orange or green?

What is the probability the spinner will point to Orange?

What is the probability the spinner will NOT point to Blue?

What is the probability the spinner will point to Yellow?

Probability 'D'

You place some coloured marbles into a bag. Answer the probability question!

3 blue & 2 yellow

Take 2 marbles from the bag. What is the probability you will have 2 blue marbles?

Take 1 marble from the bag. What is the probability it will NOT be yellow?

Take 2 marbles from the bag. What is the probability there will be 1 of each colour?

Take 1 marble from the bag. What is the probability it will NOT be green?

Take 1 marble from the bag. What is the probability it will be red?

Take 2 marbles from the bag. What is the probability they will both be red?

Take 1 marble from the bag. What is the probability it will be pink?

Take 1 marble from the bag. What is the probability it will NOT be pink?

Take 2 marbles from the bag. What is the probability they will NOT be the same colour?

Take 2 marbles from the bag. What is the probability they will both be grey?

Take 1 marble from the bag. What is the probability it will NOT be red?

Probability 'F'

You have a deck of randomly shuffled playing cards. Answer the probability question!

Choose 1 card at random. What is the probability it will be a red suit card?

Choose 1 card at random. What is the probability it will be a Heart card?

Choose 1 card at random. What is the probability it will be an Ace?

Choose 1 card at random. What is the probability it will be a Jack or Queen or King?

Choose 1 card at random. What is the probability it will be the Four of Clubs?

Choose 1 card at random. What is the probability it will be a red Ace?

Choose 1 card at random. What is the probability it will NOT be a King?

Choose 1 card at random. What is the probability it will NOT be a black suit card?

Choose 1 card at random. What is the probability it will NOT be picture card?

Choose 1 card at random. What is the probability it will be worth between 2 & 9?

Choose 1 card at random. What is the probability it will be an 8 or a 9?

Choose 1 card at random. What is the probability it will both be red suit cards?

Score: /12
